

Dear Residents and Business Owners:

The Town of Clinton is pleased to announce that we have received two grant awards that will be utilized to resurface Lower Center Street, Main Street and East Main Street. Once completed, this project will provide a new road surface with clearly marked parking spaces, new water main service to all residents and property owners, and refurbished sanitary and storm sewer lines. The Town is making a substantial investment in maintaining the infrastructure downtown in order for the area to remain the economic hub for northern Hunterdon County.

During the construction there will be the usual nuisance related instances of road closings, noise from equipment, changes in traffic patterns, etc. The Town and its contractors will make every effort to keep these interruptions to your residence or business to a minimum.

The design work for this project is expected to begin shortly. This will include the necessary televising of the existing pipes to determine what areas are in need of repair. The equipment used for this work can be noisy and, due to size, cause minor parking space loss. We will try to start this work later in the afternoon to minimize the impact on area businesses.

We will make every effort to keep you informed during the length of the project. As of right now we do not have a firm schedule for construction, but you can expect to see engineers and surveying equipment around these streets in the near future.

If you have any questions regarding the project please call the PW/Business Administrator, Jim Naples, at 735-8616. Thank you for your patience as we work towards keeping the Town of Clinton the envy of Hunterdon County and New Jersey.

Sincerely,

Mayor and Council
